#Marble_gayaforesPorcelain

La palabra 'aura', procedente del griego, hace referencia al halo especial que rodea a una persona o a un objeto. Por tanto, su leitmotiv es transmitir sensaciones. Todos estos atributos son especialmente idóneos para presentar la colección Aura, inspirada en los legendarios mármoles claros, que reversiona el material original para situarlo en contextos actuales en los que la vanguardia y la tradición confluyen en un perfecto equilibrio en torno al concepto de 'off-white', es decir, blancos mezclados con matices grises o beige tenues.

La materia digital tiene un papel protagonista en esta completa y versátil colección, que ofrece tres formatos (32x62,5, 45x90 y 60x120/Rect.) y tres bases (Calacatta, Onyx y Crema), poniendo un especial énfasis en la decoración a través de dos decorados que juegan en sintonía con diferentes relieves y composiciones geométricas. Por un lado, Deco Aura se inspira en el trabajo manual del barro y traslada a la superficie marmórea un relieve decorativo con delicadas líneas onduladas. Por su parte, con un estilo más contemporáneo, Mural Aura se compone a partir de franjas de diferentes anchos con líneas inclinadas, simulando el grabado con láser y generando un efecto de espiga. En este caso, la colocación aleatoria de las piezas permite generar superficies en movimiento acompañadas de un elegante juego de luces.

The word 'aura', from the Greek, refers to the special halo surrounding a person or an object. Therefore, its leitmotiv is to transmit sensations. All these attributes are particularly suitable for presenting the Aura collection, inspired by the legendary light marbles, which reverts the original material to place it in current contexts in which the avant-garde and tradition converge in a perfect balance around the concept of 'off-white', that is to say, whites mixed with faint nuances of grey or beige.

Digital material plays a leading role in this complete and versatile collection, which offers three formats (32x62.5, 45x90 and 60x120/Rect.) and three bases (Calacatta, Onyx and Crema), placing special emphasis on decoration through two decorations that play in tune with different reliefs and geometric compositions. On the one hand, Deco Aura is inspired by the manual work of clay and brings to the marble surface a decorative relief with delicate wavy lines. On the other hand, with a more contemporary style, Mural Aura is composed from stripes of different widths with inclined lines, simulating laser engraving and generating a herringbone effect. In this case, the random positioning of the pieces makes it possible to generate moving surfaces accompanied by an elegant play of lights.
